

# Checklist for PCSing to Japan with your pet

- Send advanced Notification of your pet's arrival → ONLY if you think you will be flying into Narita commercially or your pet will have to be shipped
- **Microchipping** → 15-digit microchip required
- **Rabies Vaccine #1**
- Wait 30 days before second rabies vaccine
- **Rabies Vaccine #2**
- **FAVN Blood Draw/Rabies Titer Test**
- 180 day wait period begins
- Try to **book your rotator flight** → Visit TMO and put in a hold before 90 days out to help ensure you get a pet slot with your ticket.
- **Book a pet friendly TLF** in Japan once you have rotator tickets
- Within 10 days of departure, visit the vet again for a pre-import inspection to receive your **health certificate**. Military vet is best.
- Once you arrive in Japan, take your pet to the vet to be registered within 72 hours → can be scheduled ahead of time!
